EDUCATION

Shiv Nadar University

B.Tech in Computer Science and Engineering - (6.35/10)

Noida, Delhi-NCR, India

Aug 2023 – Jul 2027

Govt. SR. SEC. School

Class XII - 86%

Chamrori, Radaur

Aug 2022 – Aug 2023

D.A.V. Public School

Class X - 87%

Radaur, Yamunanagar

Aug 2020 – Aug 2021

EXPERIENCE

Software Engineering Intern, Abacus Desk

May 2026 – Jul 2026

- Developed **Microtek IDM**, a 10-module warehouse inventory and dispatch system that digitized warehouse workflows for a live enterprise client serving **1,880+ warehouse workers**.
- Reduced manual tracking errors by an estimated **30%** by replacing paper-based warehouse workflows with a centralized digital platform.
- Led requirements gathering with **10+** client stakeholders across multiple design sessions.

Software Development Intern, CodeClowns

May 2025 – Aug 2025

- Developed and deployed a recommendation engine for the **Dwij AI** test-preparation platform on **Google Cloud Platform (GCP)**.
- Reduced study-material load times by **20%** and unnecessary server requests by **15%** through caching and query optimization.

Backend Development Intern, CodeClowns

May 2024 – Oct 2024

- Rebuilt **12+** backend services to handle heavy concurrent traffic without data conflicts.
- Reduced API response time by **35%** and increased data throughput by **25%**.

PROJECTS

MorphDAG: Blockchain Transaction Engine 🔗 📄

- Designed a parallel blockchain transaction scheduler that detects execution conflicts before runtime.
- Achieved a verified **4.3x** throughput improvement over baseline implementations; published in **IEEE**.

GladMeds: AI Healthcare & Emergency App 🏥

- Developed and deployed an AI-powered healthcare platform providing conversational medical assistance, medicine safety analysis, emergency response, and secure health-record management.
- Patched a critical React Server Components security vulnerability in production with zero downtime.

GradLedger: Alumni Mentorship Platform 🔗

- Developed a blockchain-backed alumni mentorship platform with verifiable identities, mentorship matching, and decentralized resource sharing.
- Designed and implemented **10+** authenticated REST APIs for secure identity verification and resource management.

OPEN SOURCE CONTRIBUTIONS

Community Projects

- Contributed to **freellmapi**, a **26.4K+** star open-source project, through a merged PR adding rate limiting, access control, and request validation to the admin backend 🔗.
- Contributed a merged pull request to **MorphDAG**, implementing a performance benchmarking feature adopted into the project's official benchmark suite. 🔗
- Contributed to **Epic Games' PixelStreamingInfrastructure** **545+** stars, a merged PR adding opt-in streamer token authentication to the signalling server 🔗.

TECHNICAL SKILLS

Languages: Go, C/C++, Python, TypeScript/JavaScript, Java, Solidity, Bash

Web & Mobile: Node.js, React, Next.js, Flutter

Databases: PostgreSQL, MongoDB, MySQL, Redis

Tools: Git, Docker, GCP, AWS, Linux

Other: System Design, Distributed Systems, REST APIs, Code Review

ACHIEVEMENTS

Smart SNU Hackathon'25 1st Place: Built a high-performance agricultural app that ran smoothly even on lower-end phones. 🔗

IEEE Publication: Co-authored a published paper on faster blockchain transaction processing (4.3x speed improvement). 📄
